INSPIRED BY NATURE

La pavimentazione modulare e
drenante con la **finitura in tappeto
erboso dal look naturale**

Modular and draining flooring with a natural-looking turf finish

Il sistema di
pavimentazione
outdoor per la
creazione di superfici
in erba sintetica
modulari e drenanti.

Il suo particolare
design garantisce
leggerezza e durabilità
nel tempo.

*The modular system
to create draining
outdoor artificial grass
surfaces. The unique
design guarantees
lightness and
durability over time.*

An aerial photograph showing a rooftop garden installation. In the upper half, a rectangular swimming pool with blue water and lane lines is visible. Below the pool, three workers in blue uniforms are installing green modular panels on a white rooftop surface. Several stacks of these modular panels are scattered around the workers. The rooftop has a glass railing at the top, and a building with a modern architectural style is visible in the background. The bottom of the image shows a white architectural element, possibly a vent or part of the building's structure.

MODULI IN APPOGGIO CONTINUO

MODULES FOR CONTINUOUS SUPPORTS

A close-up photograph showing a hand holding a red screwdriver, adjusting a black plastic support structure. The structure is a circular base with multiple adjustable segments, designed to hold artificial grass modules. The modules are filled with green artificial grass. The background is a plain white surface.

MODULI SU SUPPORTI REGOLABILI
